<b>Office Action Summary</b>	<b>Application No.</b> 10/561,741	<b>Applicant(s)</b> KRONER, GREGOR	
	<b>Examiner</b> William C. Joyce	<b>Art Unit</b> 3656	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This Office Action is in response to the amendment filed December 14, 2009 for the above identified patent application.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 11-14, 20-25, 27, 32, and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Sullivan (USP 3,465,405).

Sullivan illustrates in Figures 14-15, a bearing arrangement comprising: a bearing point in the form of a bearing opening of a base part (50); and a bearing element in the form of a ball engaging the base part through the bearing opening; wherein the base part has on the edge of the bearing opening at least one deformation area (46) which as a result of plastic deformation protrudes radially inwards from the edge and acts as a radial support for the bearing element.

Referring to Figure 12, Sullivan illustrates the deformation area (46) formed with a tool having projecting portions (44) configured to form a recessed area, the recessed area forming a weakened area positioned remote from the bearing

opening, the recessed area having a lower rigidity with respect to the bearing opening, the deformation area being symmetrical relative to a central plane.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 17, 33, and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sullivan (USP 3,465,405).

Sullivan does not disclose the bearing device used in combination with a seat side part or a lever. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the bearing arrangement of Sullivan in combination with known pivotable components, such as a seat side part or a lever, motivation being to support the pivotable component with a simple bearing arrangement.

5. Claims 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sullivan (USP 3,465,405) as applied to claim 1 above, and further in view of Bolgiano (USP 1616578).

Sullivan does not disclose a bolt used in combination with the bearing arrangement, but it was known to use a bolt as claimed. For example, Bolgiano

Art Unit: 3656

disclose a bolt (14) used in a bearing. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the bearing arrangement of Sullivan in combination with a bolt, as taught by Bolgiano, motivation being to provide a simple arrangement for supporting two components for relative rotation.

***Allowable Subject Matter***

6. Claims 10, 15, 16, 26, 28-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3656

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
